# SAFFAT HASAN

(xxx) xxx-xxxx saffathasan@gmail.com

### **EDUCATION**

Drexel University Philadelphia, PA Graduation: March 2021

- B.S./M.S. in Computer Science GPA: 3.66
- Graduate Coursework: Test Driven Dev & eXtreme Prog; Web Services & Mobile Arch; Data Analysis at Scale.
- Undergraduate Coursework: Software Architecture; Software Engineering; Software Evolution.

#### PROFESSIONAL EXPERIENCE

Cigna Software Engineer Apr 2020 - Present

- Developed incremental deployment strategies to drive service mesh adoption using Gloo
- Refactored Jenkins library to use K8s native pipeline (Tekton) for efficiency, speed, & scalability
- Delivered authentication GRPC Service conforming to Envoy's extauthz interface to encapsulate custom auth logic
- Wrote presigned URL generator Lambda emphasizing JSON Schema for contract validation
- Lead intern project using TDD and automated deployment/management patterns with GitOPS/ArgoCD
- Leveraged knowledge in Go, Kubernetes, EKS, AWS Lambda, OpenShift, Gitlab CI, Tekton CI, ArgoCD

#### **Lockheed Martin**

### **Software Engineering COOP**

Apr - Sept 2019

- Transitioned computer program into Git from Clearcase including training and best practices
- Incorporated automated testing using Google Test, JUnit, and Maven framework through feature toggles
- Sped up build time 40% by decomposing product through discussions about architecture with project leads
- Integrated build into Jenkins pipeline to automate deployment, SCA, and testing on every deliverable
- Leveraged knowledge in Maven, Git, Jenkins, JUnit, Google Test, Java, C++

**MicroOffice** 

#### **Software Developer**

Feb 2017 - Jan 2019

- Built contract licensing and management system using PostgreSQL, Python, Flask, and Jinja
- Integrated external desk management system with existing operations interface using web API calls
- Updated payment portal to allow customers to make purchases independent of sales team
- Automated operations visual reporting service to provide useful at-a-glance business metrics
- Leveraged knowledge in Full Stack Web development, Python, JavaScript, Git, PostgreSQL, Flask

## SOFTWARE PROJECTS

This Resume Sept 2020 - Present

- Automatically deploy main branch to multiple targets ssh-deploy and gh-pages-deploy
- Decouple data from style enabling multi-format generation using single YAML source
- Generate PDF using LaTeX wrapped in Docker and Python templating engine
- <u>Utilized</u> Python, LaTeX, Docker, Gitlab CI, Github Action

# Film Rating Microservice POC

June - Aug 2020

- Architected simple yet highly decoupled IMDB clone with independently deployable services
- Created web and client service consumers with centralized authorization pattern
- <u>Utilized</u> Flutter, GraphQL, Node.js, MongoDB, Docker Compose, JWT Authentication

King Me Jan - June 2019

- Designed online checkers game using Flask SocketIO to allow players to create and join games
- Coordinated student team of four by creating mocked interfaces to enable concurrent development
- Emphasized portability by utilizing Docker to standardize runtime environment
- Enforced quality through use of Gitlab CI to automate static code analysis and testing
- Utilized Gitlab CI, Docker, Flask SocketIO, Jinja, Pytest, Pylint, JSHint

### TECHNICAL SKILLS

- Proficient: Java, Python, Go, Unix, Git, SQL, JavaScript, Mayen, Tekton, Flask, HTML/CSS
- Familiar: C++, C, Docker, LXC, SaltStack, Jenkins, Node.js
